WORK EXPERIENCE

• Web Minds IT Solution

Web Minds IT Solution pvt ltd, Pune - FEB 2022 - Present

Job Responsibilities:

Frontend Development:

- Designed and integrated React components to elevate frontend sites, delivering responsive and captivating user experiences.
- Implemented React JS controllers to maintain each view data.
- The front end use HTML5 , CSS, React Js, and bootstrap to build a single page web app that communicate with back-end via RESTful API.
- Maintaing Parent and child elements bt using state and props in react JS.
- Developed certain features of the application functionality i.e crud(create, read, update, delete) features using require.js and responsive design.
- Created React Js for reusable components(multi-field form elements). background file uploads.
- Integrated Redux for efficient state management, significantly improving application performance and user interactions.

Backend Development:

- Utilized Node.js and MongoDB to develop robust backend solutions, ensuring efficient data management and system functionality.
- Creating Node JS servers using express.
- Collaborated in the creation and customization of backend applications, optimizing performance and user interactions.
- Creating Node JS servers using express, Mongo database creation / integrating using mongoose, User Interface & Usability

• Source Code Management (GITHUB)

- Managed source code repository and created branches as per branching strategy
- Created remote repository and managed user access over github and remote repository
- Resolved merge conflict occurs during managing the branches
- Raised pull requests & merged different branches after code was fully tested by the teams.
